experiment

A Collapsible & Pivoted

SQUARE

Connected to a

CIRCLE

acting as a Crank,

when Rotated then lead to the

One24thOUTofPHASE

Discovery

at the

SQUARES

2 Free ENDS.

This MECHANICAL hardwired PRINCIPLE

lead to all sort of interesting possibilities.

Please read on...and yes there is  
"somewhat" more @ the url below....

<https://junkyardinnovations.info/index.html>

Why may this 'one24thoutofphase'  
EB mathematical discovery be  
Useful? See Point 3 on  
Speculative list below.

- 1 Physics : Deeper insights into relations between fundamental forces & particle motions, atoms etc.
- 2 Biology : Why do Proteins fold the way they do ?
- 3 Mechanics : Applying the 1/24 Leverage difference that dynamically exist on every 1/2 cycle of rotation.
- 4 Communications : Much More data in 1 frequency ? Since Twines Shapes can vary greatly per 1 frequency.
